DIGITAL LITERACY PROJECT

PROJECT REPORT

CONTENTS:-

1. Introduction
2. Task 1 Write Up
3. Task 2 Write Up
4. Task 3 Write Up
5. Task 4 Write Up
6. Task 5 Write Up

Name - Dhruv Shrivastava
Reg. No. - 25BAII236
Branch- Computer Science & Engineering (AI & ML)
Year - Ist year (2025-2029)
Course Code - CSE0001

- **INTRODUCTION**
- **Brief overview of the project and the scenario:**

In today's digital age, technology plays a major role in our academic and personal lives. From attending classes to submitting assignments and communicating with others, digital tools are used everywhere. This project helped me understand the importance of digital literacy and how it goes beyond just using devices. It includes being responsible, safe, and professional while using digital platforms.

As a Student Digital Ambassador, this project gave me practical exposure to different aspects of digital life, such as creating a professional online presence, using collaboration tools, writing formal emails, and understanding cyber safety. Each task in this project helped me learn something useful that I can apply in my academic journey and future career.

TASK 1 WRITE UP

- **What you made, tool used, reflection**

➢ **Task 1: Digital Literacy Awareness Infographic**

- For this task, I created a digital literacy awareness infographic using Canva. The aim of my design was to explain what digital literacy means and why it is important for students. In my infographic, I included topics such as safe internet practices, useful digital tools, and maintaining a professional online presence.
- I used simple visuals and minimal text so that the information is easy to understand at a glance. I added icons and sections to make the design more organized and visually appealing. The infographic highlights how students can use tools like Google Docs and Canva effectively, while also staying safe online by avoiding suspicious links and protecting personal information.
- One challenge I faced while creating the infographic was balancing content and design. It was difficult to include important points without making the slide look crowded. However, this task helped me improve my creativity and taught me how to present information clearly and effectively.

TASK 1

DIGITAL LITERACY:
SMART SKILLS FOR A SMART STUDENT
1 WHAT IS DIGITAL LITERACY?
• Ability to use digital tools effectively
• Understanding online safety
• Communicating responsibly online
• Managing digital identity
2 USEFUL DIGITAL TOOLS FOR STUDENTS
Google Docs – Assignments & notes
Google Docs
• Assignments & notes
GitHub
• Coding & projects
Linked in
LinkedIn
• Professional networking
Canva
• Presentations & designs
3 SAFE INTERNET PRACTICES
• Use strong passwords
• Avoid unknown links
• Never share OTP or personal data
• Enable two-factor authentication
4 PROFESSIONAL ONLINE PRESENCE
• Use real name and formal profile
• Build Linkedin & GitHub profile
• Build Linkedin & GitHub profile
5 EMAIL ETIQUETTE
• Use proper subject line
• Be polite and clear
• Avoid slang
• Keep email concise
BE SMART, STAY SAFE, STAY PROFESSIONAL ONLINE!

TASK 2 WRITE UP

- **Platforms set up, purpose, future plans**

➢ **Task 2: Build Your Student Digital Portfolio**

For this task, I created and updated my profiles on GitHub, LinkedIn, and Kaggle. These platforms are very useful for building a strong academic and professional presence as a student.

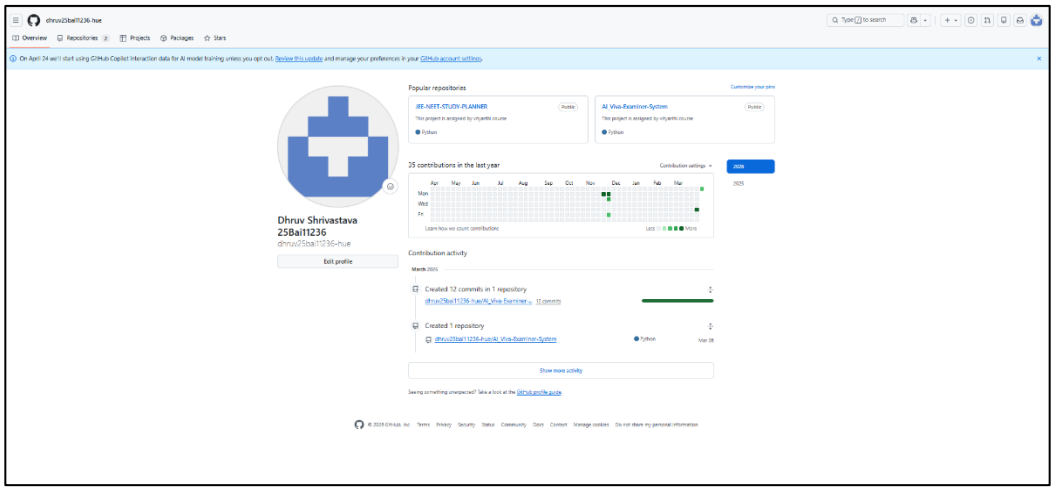
GitHub is mainly used to upload and manage coding projects. I created my profile and added a README file that includes my basic details and what I aim to learn in the coming years. I plan to regularly upload my projects here so that I can track my progress and showcase my skills.

LinkedIn is a professional networking platform where I added my education details, including my degree, college, and expected graduation year. It will help me connect with professionals, explore internship opportunities, and stay updated with industry trends.

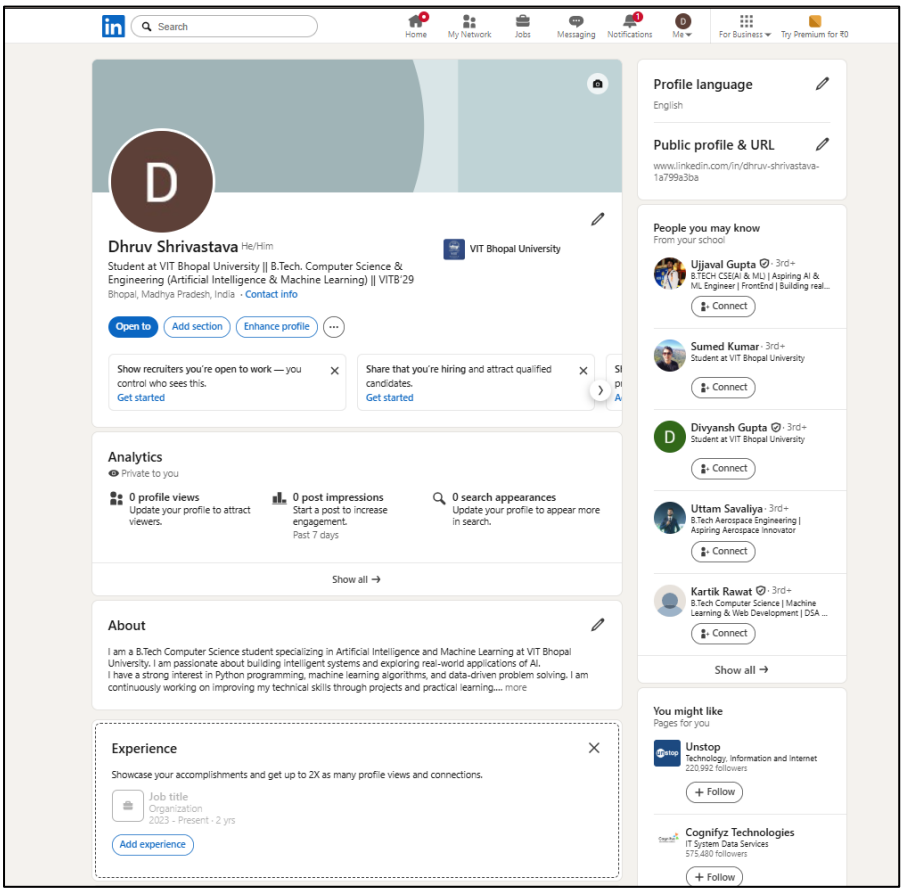
Kaggle is a platform mainly used for data science and machine learning. Although I am a beginner, I explored datasets and basic notebooks on Kaggle. I plan to use it in the future to practice, learn new concepts, and participate in competitions.

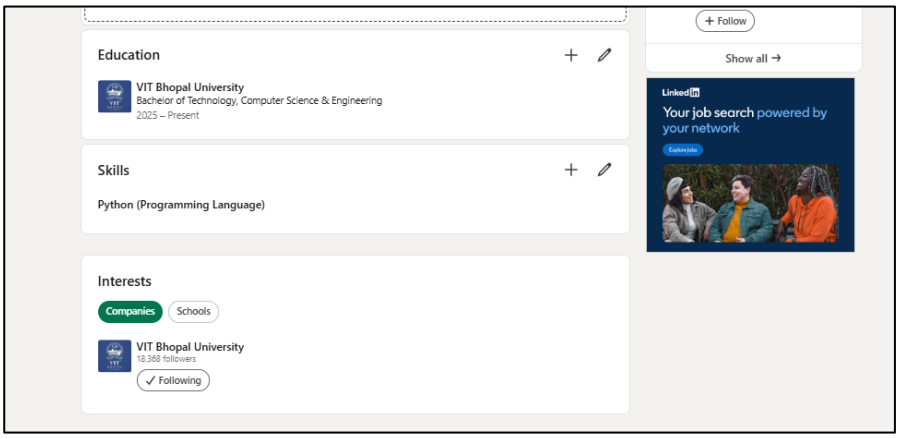
Over the next four years, I will continue updating these platforms with my work and achievements to build a strong digital portfolio.

GitHub Profile

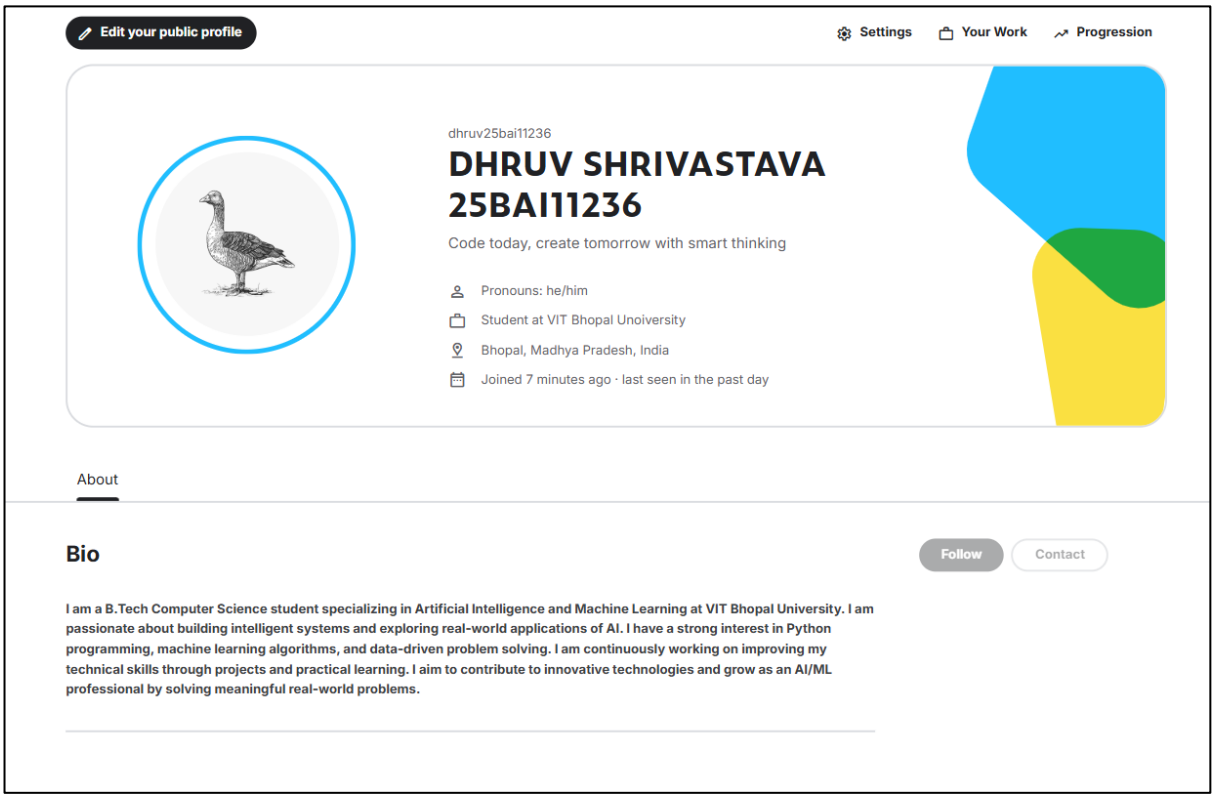


LinkedIn Profile





Kaggle Profile

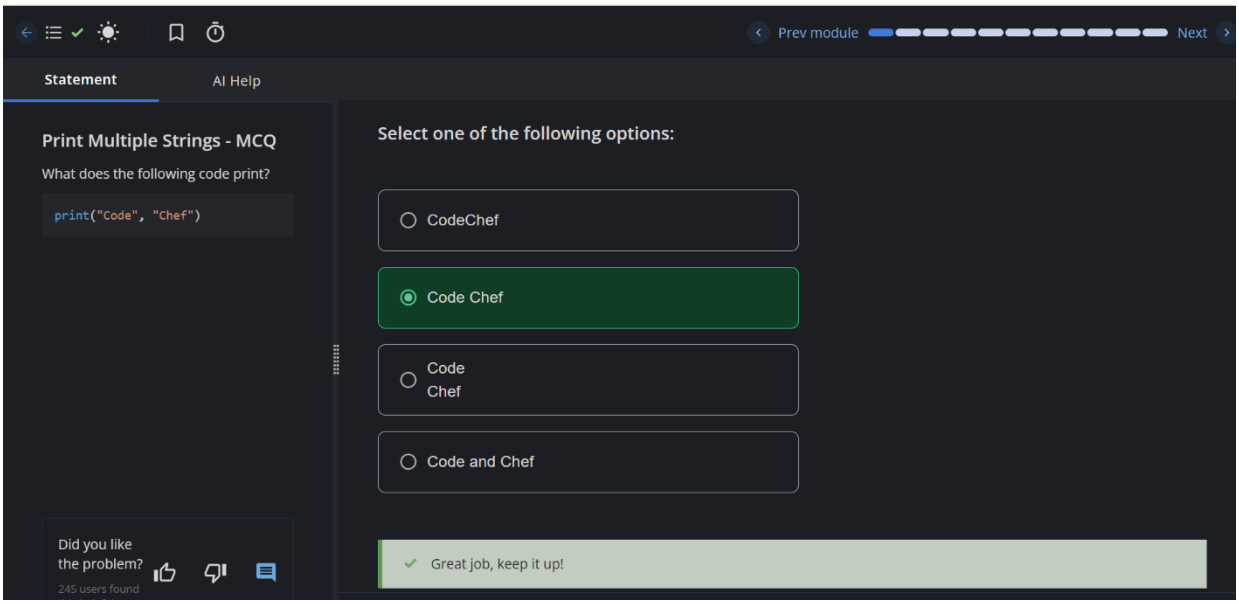


TASK 3 WRITE UP

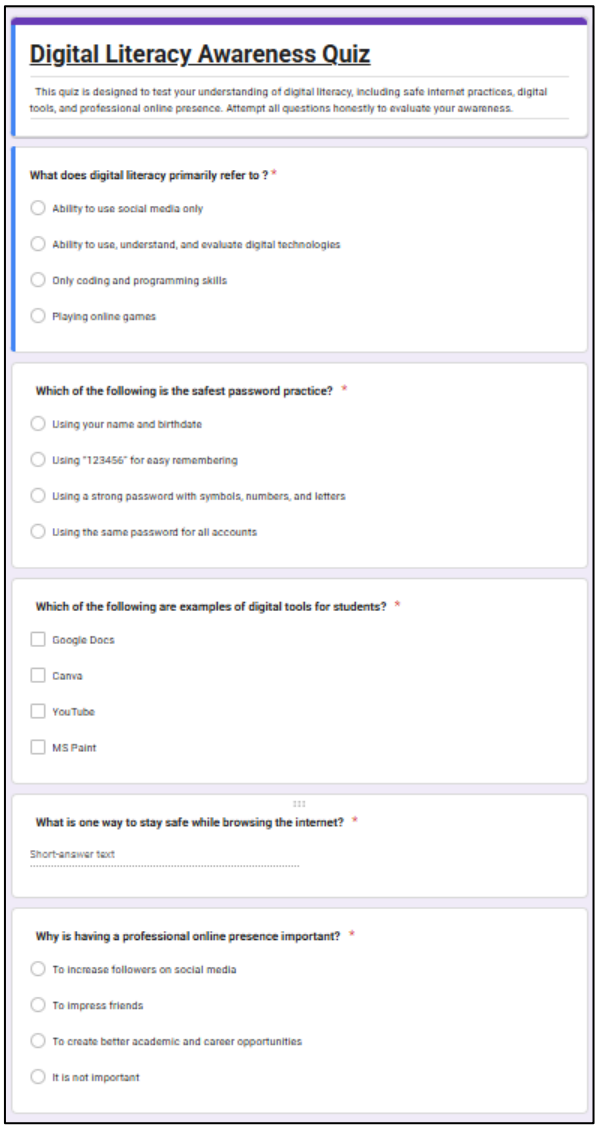
- **Platforms used, what you built/practised**

➢ **Task 3: Explore Coding & Collaboration Platforms**

- **Part A: Coding Practice**



- **Part B: Google Workspace Collaboration**
- In this task, I explored both a coding platform and a collaboration tool. For the coding part, I created an account on CodeChef and attempted a beginner-level problem. As I am still new to coding, it was a bit challenging at first to understand the logic and approach required to solve the problem. However, after trying and learning step by step, I was able to complete it. This experience helped me understand how coding platforms work and improved my problem-solving thinking.
- For the collaboration part, I created a Google Form titled "Digital Literacy Awareness Quiz." The form included five questions based on topics like safe internet practices, digital tools, and professional online presence. I also checked the responses using Google Sheets, which helped me understand how data is collected and organized.
- This task was very useful for me because it introduced me to practical tools that I can use during my academic journey. CodeChef will help me improve my coding skills with regular practice, while Google Forms will be helpful for creating surveys and quizzes easily.



Digital Literacy Awareness Quiz

This quiz is designed to test your understanding of digital literacy, including safe internet practices, digital tools, and professional online presence. Attempt all questions honestly to evaluate your awareness.

What does digital literacy primarily refer to ? *

- Ability to use social media only
- Ability to use, understand, and evaluate digital technologies
- Only coding and programming skills
- Playing online games

Which of the following is the safest password practice? *

- Using your name and birthdate
- Using "123456" for easy remembering
- Using a strong password with symbols, numbers, and letters
- Using the same password for all accounts

Which of the following are examples of digital tools for students? *

- [ ] Google Docs
- [ ] Canva
- [ ] YouTube
- [ ] MS Paint

What is one way to stay safe while browsing the internet? *

Short answer text

Why is having a professional online presence important? *

- To increase followers on social media
- To impress friends
- To create better academic and career opportunities
- It is not important

TASK 4 WRITE UP

- **Communication scenario, key learnings**

➢ **Task 4: Email Communication & Etiquette**

- In this task, I learned how to write professional emails and understood the importance of proper digital communication. A common issue that can arise due to poor communication is sending unclear or informal emails. For example, if a student sends an email without a subject line or uses casual language, it may create a negative impression or lead to confusion.
- Such mistakes can be serious, especially when communicating with professors or applying for internships. It may result in delayed responses or missed opportunities.
- To avoid this, it is important to follow email etiquette, such as writing a clear subject line, using a polite tone, and organizing the message properly. Good communication skills help in creating a positive impression and ensure that the message is understood clearly.

TASK 5 WRITE UP

- **What surprised you, one habit you will change**

➢ **Task 5: Cybercrime Awareness Reflection.**

While working on the topic of UPI and online payment fraud, I realized how common and risky these scams have become. What surprised me the most was how easily people can be tricked into sending money just by misunderstanding a simple payment request.

I learned that many frauds happen because people are not fully aware of how digital payment systems work. Even a small mistake, like entering a UPI PIN without checking the request, can lead to financial loss.

After learning about this topic, I will be more careful while making online transactions. I will always verify payment requests and avoid sharing any sensitive information like OTPs or PINs. This task made me more aware and responsible while using digital platforms.

- **Conclusion**
- **Overall learning from the project**

This project has been a very meaningful learning experience for me, as it helped me understand digital literacy in a practical and real-life way. I realized that it is not just about using technology, but also about using it responsibly, safely, and professionally. Through different tasks, I learned how to build my online presence using platforms like GitHub, LinkedIn, and Kaggle, and how to communicate properly through emails. I also became more aware of cyber threats such as UPI fraud and how to stay safe online. Each task improved my confidence and understanding of digital tools. Overall, this project has prepared me to use technology wisely and build a strong digital identity for my future.
